**INDOOR AIR QUALITY IMPROVEMENTS**

**TEST SCORING**

Test scores declined as temperatures climbed above 70°F and scores reached the lowest levels at temperatures exceeding 79°F. Students performed best while enjoying temperatures around 70°F.

**Reading Competence**

Decrements in reading speed and reading comprehension at 81°F compared to 48°F were as large as 30%.

**Student Performance versus Temperature**

Student performance versus temperature based on a study in Denmark. Performance was based on the speed and accuracy of completing various school work tasks.

NEWBURGH ENLARGED CITY SCHOOL DISTRICT

INDOOR AIR QUALITY IMPROVEMENTS

CENTRAL AIR CONDITIONING INSTALLATION

4% TO 16% INCREASED STUDENT PERFORMANCE

UP TO 12% DECREASED ABSENCES

TEMPERATURE CONTROL

EVIDENCE STRONGLY SUPPORTS THE NEED TO AVOID EXTREME CONDITIONS AND TO PROVIDE FOR AS MUCH INDIVIDUAL TEMPERATURE CONTROL AS POSSIBLE. THERE IS ALSO GOOD EVIDENCE THAT MODERATE CHANGES IN ROOM TEMPERATURE, EVEN WITHIN THE COMFORT ZONE, AFFECT CHILDREN'S ABILITIES TO PERFORM MENTAL TASKS REQUIRING CONCENTRATION.

STUDENT ATTENDANCE

IMPROVED INDOOR AIR QUALITY (IAQ) CAN REDUCE ABSENCES RELATED TO RESPIRATORY INFECTIONS & ALLERGIC DISEASES FROM BIOLOGICAL CONTAMINANTS.

ESTIMATED HOME OWNER TAX IMPACT

Proposition #1

Estimated Average Monthly Tax Impact
+/- $0.98 Per Month

= $0.98 /Month

Proposition #1 & #2

Estimated Average Monthly Tax Impact
+/- $1.82 Per Month

= $1.82 /Month

NO TAX IMPACT AT ALL FOR EIGHT YEARS

Estimates Based on Property Tax Impact Per Month for a Property with a Full Value of $100,000*

*Figures do not reflect STAR or Veterans exemptions
ESTIMATED HOME OWNER TAX IMPACT

• For purposes of paying taxes, every property has an Assessed Value which when multiplied by the tax rate produces the amount of tax owed.

• When districts such as Newburgh City SD are comprised of municipalities with varying Equalization Rates the Assessed Value is converted to Full Value.

• Full Value = Assessed Value X Equalization Rate

• The Full Value is then multiplied by the tax rate to produce the amount of tax owed.
